1. A set of NICT-generated SMILES L2r data can be used by scientists who have specified their research task and have signed this data protocol.
2. NICT cannot give any warranty with respect to any characteristics of the processed SMILES L2r data.
3. NICT doesn't accept any further commitment related to these data, such as re-formatting etc., unless there exists a written agreement which rules data exchange.
4. Use of NICT-generated SMILES L2r data in publications is encouraged. Joint-authorship must be offered to related NICT scientists, which implies the usual authors' rights and commitments and timely information of the NICT SMILES L2r data analysis scientists on scientific progress or problems.
5. Relevant SMILES publications have to be referenced in publications where "NICT-generated SMILES L2r data are used, and JEM/SMILES mission is a joint project of National Institute of Information and Communication Technology (NICT) and Japan Aerospace Exploration Agency (JAXA)".
6. NICT SMILES L2r data analysis scientists have the right to refuse to allow their work to be used in another publication prior to their own publication.
7. Users of SMILES L2r data generated at NICT must not redistribute these data to third groups without written permission from NICT L2r scientist, whoever had processed the data.
8. Data users who find irregular or unexpected features in the data or suspect errors must inform the NICT data analysis scientists immediately. In particular, such issues have to be clarified with the NICT data analysis scientists before these problems will be communicated to the public.
9. NICT-processed SMILES L2r data must not be used in projects or proposals which may compete with NICT proposals or projects without approval by NICT.
10. Users of NICT SMILES L2r data grant NICT access to their data under similar conditions under those they have access to NICT-generated SMILES L2r data.

The undersigned agrees with all conditions and statements listed above.
